Record Breaker Installation Instructions:
-Isaiah Thacker

1. Open Android Studio
2. Select File -> New -> Project from Version Control -> GitHub
3. In the Git Repository URL field, paste the following:
   https://github.com/ThackerCI/PlatformerSE1.git
4. Click "Clone"
5. If applicable, select whether you wish to open the project in the current window or a new window.
6. If prompted, click "no" when asked about the VCS root.
7. Hit "Try Again" if you have Gradle sync issues.
8. Run the application on the device or emulator of your choice.

Gameplay Instructions:

The white, blocky guy represents the player character. Blue squares represent floors and walls (collectively called "blocks".) Purple objects represent enemies. The circular disc on the right side of the screen represents the goal object (the "record.")

1. Press "Tutorial" to begin the tutorial level, which will explain how to play the game.
2. When the level is completed, press the "Return to Menu" button to return to the menu.
3. Press "Level 1" to play the first non-tutorial level.
4. Press "Credits" to view the credits for the game.
